

How to Easily Distribute Butter Braid products:

Preparation:

1. Email, call us or place your order online with your final order.
2. You may round up your order to even cases (6 braids per case) if you would like to have extras on-hand for late orders, or if your group would like to have additional braids to sell after delivery.
3. Sort order forms alphabetically and / or by class.
4. Order form columns should be totaled to the bottom and "Total braids" box filled in.
5. Setup an area with 2 long table's end-to-end forming a straight assembly line. Setup multiple rows for deliveries over 1500 braids.
6. Contact volunteers to help us sort orders:
Less than 500 braids = 1-2 volunteers
500-1500 braids = 4-8 volunteers
1500-2000 braids = 10-20 volunteers
2000+ braids = Call us for suggestions on volunteers

Delivery Day:

1. Please pick an area for delivery without steps and close to an outside door.
2. We will assemble your braids in order by flavor on the tables and count with you prior to sorting any orders.
3. Volunteers work in pairs. One person reads the order form (Reader) and one person picks the order (Picker). Our boxes are used for packaging to keep the braids cold.
4. We will check orders and pack them at the end of the assembly line for you.
5. Volunteers can write names on boxes after assembly is complete.

Plan:

1. You may have no-shows or absentees the day of delivery so have a storage plan.
2. Braids may sit out of the freezer for up to 3 hours at room temperature.
3. Have your participants bring coolers if they need more than 3 hours. Ice is not needed.
